

EXTV-PEG Programming

OVERVIEW

Exeter's cable access channels provide important benefits to the town and region as a whole. The stations allow the public to have a television source that informs them on local events. It provides a forum for the exchange of information that is specific to Exeter and dedicated to public use. The existence of Local Access TV also encourages the creation of new programming that the public would otherwise be deprived of under traditional commercial channels. These programs can be seen on three distinct channels.

The three channels are to separate out the three distinct kinds of programming: Community Access, which is non-government sponsored, community programming, Government, which is Town of Exeter specific programming and represents town government, and Education programming, which covers local schools and SAU16 events, activities, programming, and school board meetings.
